The conference is designed to offer prenatal education for obstetric and neonatal nurses, pediatricians, family medicine physicians, early intervention providers and other healthcare professionals who care for obstetric and neonatal patients in either inpatient or outpatient settings.

This conference is sponsored by the Southern Illinois Perinatal Network and the Saint Louis University School of Medicine.

The conference will be held on September 27, 2017, at the Hilton Garden Inn in O'Fallon, Illinois, 62269.

Return Service Requested
This conference is designed to update nurses, obstetricians, pediatricians, family medicine physicians, early intervention providers and other health care professionals on current issues in the clinical practice of obstetrics and infant care. By attending this program, participants will be able to:

- Describe the effects of incivility and bullying on patient outcomes, patient human capital, and productivity in health care; reflect on personal contributions to a culture of incivility; and find tools to help build and sustain cultures of civility and respect in healthcare.
- Recognize and respond to unmet mental health problems that patients with hypertensive disorders may experience; incorporate education tools and methods that contribute to patients’ understanding of pre eclampsia symptoms.
- Describe the risk factors, clinical, physical examination and laboratory findings in hypertensive encephalopathy; discuss the criteria for and implementation of therapeutic hypothermia.
- Examine what makes up a family and how cultural changes have shifted the definition of “family,” examine the diversity and dynamics in today’s families, and discuss the impact we have as professionals.
- Identify situations that cause agitation in the newborn with NAS and methods to help parents of newborns with NAS facilitate their infant’s growth and development after the hospital stay.
- Discuss the underlying physiology for complex EFM tracings; outline the management for Category II, I and III EFM tracings.
- Define normal physiologic birth; describe interventions to help women be successful in achieving a healthy, normal, physiologic birth.
- Identify when a mother suffering from addiction should be breastfeeding; discuss the amount and effects of methadone and buprenorphine in breast milk; describe the role of breastfeeding in recovery for mom and baby.
- List the criteria and limitations for diagnosis of perinatal sepsis; outline management recommendations for maternal and neonatal care.
- Describe the long-term developmental and social outcomes for families affected by NAS; describe ways to help families transition to home; discuss developmental follow-up care to optimize outcomes for infants with NAS.
- Identify at least one experience families of children with complex medical needs face; process through this experience; describe how to support families when a child passes; and discuss the value of self-compassion and care as professionals.
- Identify the foundation of compassionate care as human presence; understand a need for understanding of patient and family needs in a clinical setting; implement best practices in patient communication.

Who Should Attend:
Nurses, obstetricians, family medicine physicians, pediatricians, early intervention providers and other healthcare professionals who care for obstetric and neonatal patients in either inpatient or outpatient settings.

FACULTY & PLANNING COMMITTEE MEMBERS

Glenn Barber, BSN, RNC-NIC, **
Neonatal Outreach Coordinator
SSM Health Cardinal Glennon
Children's Hospital
St. Louis, MO

Lynn Barts, MBA, CMI**
Contractor, Illinois Early Intervention Program
Local & Child & Family Connections Office
O’Fallon, IL

Natalie Bean, BSN, RN, CLC**, Staff RN
HSF St. Elizabeth’s Hospital
Belleville, IL

Rebecca Bieden, MSN, RN, IBCLC
Lactation Consultant
SSM Health St. Mary’s Hospital
St. Louis, MO

Valencia Smith, BSN, RNC**
Clinical Educator

Conference rates are available for reservations made on or before September 5, 2017.

Participants are encouraged to bring a light sweater or jacket since room temperatures vary.

This conference is designed to update nurses, obstetricians, pediatricians, family medicine physicians, early intervention providers and other health care professionals on current issues in the clinical practice of obstetrics and infant care. By attending this program, participants will be able to:

• Describe the effects of incivility and bullying on patient outcomes, human capital, and productivity in health care; reflect on personal contributions to a culture of incivility; find means to help build and sustain cultures of civility and respect in healthcare.

• Recognize and respond to unmet mental health problems that patients with hypertensive disorders may experience; incorporate education tools and methods that contribute to patients’ understanding of pre eclampsia symptoms.

• Describe the risk factors, clinical, physical examination and imaging findings in hypertensive encephalopathy; discuss the criteria for and implementation of therapeutic hypothermia.

• Examine what makes up a family and how cultural changes have shifted the definition of “family,” examine the diversity and dynamics in today’s families and discuss the impact we have as professionals.

• Identify situations that cause agitation in the newborn with NAS and methods to help parents of newborns with NAS facilitate their infant’s growth and development after the hospital stay.

• Discuss the underlying physiology for complex EFM tracings; outline the management for Category I, II and III EFM tracings.

• Define normal physiologic birth; describe interventions to help women be successful in achieving a healthy, normal, physiologic birth.

• Identify when a mother suffering from addiction should be breastfed; discuss the amount and affects of methadone and buprenorphine in breast milk; discuss the role of breastfeeding in recovery for mom and baby.

• List the criteria and limitations for diagnosis of perinatal sepsis; outline management recommendations for maternal and neonatal care.

• Describe the long-term developmental and social outcomes for families affected by NAS; describe ways to help families transition to home; discuss developmental follow-up care to optimize outcomes for infants with NAS.

• Identify at least one experience families of children with complex medical needs face; process through this experience; describe how to support families when a child passes; and discuss the value of self-compassion and care as professionals.

• Identify the foundation of compassionate care as human presence; demonstrate an understanding of patient and family needs in a clinical setting; implement best practices in patient communication.

CONFERENCE SCHEDULE

REGISTRATION / EXHIBITS / CONTINENTAL BREAKFAST
8:00 – 8:15 am
WELCOME AND ANNOUNCEMENTS – Robyn Guda, RN, MSN

OPENING KEYNOTE SESSION
1:15 – 2:15 pm
“A Call to Action: Addressing Incivility and Bullying in Healthcare”
Marcus Engel, MS, CSP, CPXP
Incivility and bullying in the healthcare setting results in the loss of human capital and impairs patient, family, and population health outcomes. Directly affected healthcare workers and bystanders may experience high levels of stress and anxiety and leave the workforce prematurely, model the behaviors themselves with colleagues and customers, and close down communication that affects care. The problem crosses all healthcare boundaries. Participants will be equipped with strategies, including the action mnemonic “BE AWARE...and care”, and tools for building cultures of respect in their organizations. (EI)

2:30 – 3:30 pm
12. “Hypoxic Ischemic Encephalopathy: How to Identify and Treat”
Marcus Engel, MS, CSP, CPXP
Marcus Engel, MS, CSP; CPXP is a Certified Speaking Professional & author whose messages provide insight and strategies for excellent patient care. His keynote presentation, “The Other End of the Stethoscope” has been witnessed by tens of thousands of healthcare professionals and his books are used in scores of nursing and allied health programs to teach the basic foundations of caregiving.

As a college freshman, Marcus Engel was blinded and nearly killed after being struck by a drunk driver. Through two years of rehab, over 350 hours of reconstructive facial surgery and adaptation through a multitude of life changes, Marcus witnessed the good, the bad and the profound in patient care. He has authored four books and is at work on a fifth, “Beyond Patient Experience” which is due out in late 2017. He is the creator of NarrativeNursing.com, a site designed to help lead nurses into using proven techniques and therapeutic resources for dealing with the effects of compassion fatigue and burnout. In 2010, “The Droog” a short film based on Marcus’s memoir was released and can be viewed online. Marcus and his wife, Marvelyn, are the co-founders of the I’m Here Movement, a non-profit organization which is changing the culture of care with two simple words. Marcus holds a B.S. in sociology from Missouri State University (2000) and a M.S. in Narrative Medicine from Columbia University in New York City (2012.) He lives in Orlando, Florida with Marvelyn and his Seeing Eye dog, Elliot.

REGISTRATION FORM

SOUTHERN ILLINOIS PERINATAL NETWORK CONFERENCE

GENERAL SESSION SPEAKERS

Beth Nachtsheim Bolick, DNP, ARNP, PPNP-BC, CPNP-AC, FAAN
Dr. Beth Bolick directs the Rush Acute Care PNp program which is nationally recognized for excellence. She is the co-editor of the text Pediatric Acute Care: A Guide for Interprofessional Practice. Dr. Bolick has transformed the care of ill and injured children through establishing new standards in pediatric emergency care, conceptualizing new pediatric nurse practitioner role and education models, and advocating for policy changes to improve the quality of nursing care for these children at the state and national levels. Dr. Bolick has been a member of the state of Illinois’ Emergency Medical Services for Children (EMSC) since 1994. The Illinois EMSC is now the model for facility recognition for pediatric centers across the country.

Over the past three years, Dr. Bolick has worked to improve the effectiveness of interprofessional healthcare teams. She is a Robert Wood Johnson Foundation Executive Nurse Fellow who worked with a Fellows national project team to provide healthcare leaders resources to promote interprofessional practice and improve the quality of care and outcomes for patients. Her project was to develop a comprehensive toolkit for use by healthcare teams and organizations to improve the quality of patient care and outcomes.

ADDITIONAL EXHIBITORS:
• CHILDREN’S HOME AND AID
• CHILD CARE RESOURCE AND REFERRAL
• ILLINOIS HEAD START ASSOCIATION
• INTERNATIONAL CESAREAN AWARENESS NETWORK (ICAN)

“Funding provided in part by the Illinois Department of Public Health Perinatal Program Grant.”

ACKNOWLEDGMENTS

Lunch: (PLEASE CHOOSE ONE)
• Chicken Dijon
• Penne Pasta Primavera (vegetarian)
Coffee, Tea and Water will be provided throughout the day.

Conference Tuition:
$100.00
After September 5, 2017:
$120.00
NO REFUNDS WILL BE GIVEN AFTER SEPTEMBER 15, 2017. ALTERNATE ATTENDEES ARE ALLOWED.

The toolkit has been downloaded by over 191,000 healthcare providers from 139 countries.

REGISTRATION FORM
SOUTHERN ILLINOIS PERINATAL NETWORK CONFERENCE

CONCURRENT SESSIONS
1. “Preeclampsia – Putting the Patient at the Center of Better Outcomes”
   Elena Tager, BA
   Preeclampsia, from the patient’s perspective, can be quite traumatic. The impact on the patient, her family and loved ones can span physical, mental, and emotional effects, both in the immediate postpartum period, as well as long-term. Patient education, engagement, and support plays an important role in not only preventing the worst outcomes, but in optimizing health recovery and remaining life course. Several stories are examined through the lens of prevention and quality improvement initiatives. (EI)
2. “Meet the Family”
   Maria Matticks, RN, BSN
   When thinking about the term ‘family’ many images come to mind. The children and families we serve in the Early Intervention program are unique and diverse for many reasons. In this fun and interactive session, discussion and activities will encourage participants to learn more about how to work with families and partner with parents and engange in activities and discussions to focus on special considerations for various populations in Early Intervention including: military families, adoptive/foster families, families with same-sex partners, and single/leaf parents among others. Finally and most importantly participants will have a chance to hear directly from the families to learn firsthand about their experiences in EI via a series of video interviews. (EI)
   Maureen Foster, CNM, CPM
   Birth is powered by the innate human capacity of the woman and fetus. In this presentation, we will discuss how to maximize the woman’s opportunity to have a healthy birth. (EI)
4. “The Late Preterm Infant”
   Colleen Claessen, MD
   This presentation will review several key interventions that are important in the home setting to ensure success for the infant and family. (EI)
5. “Fetal Monitoring Case Studies”
   Carol Burke MSN, APRN/CNS, RNC-OB, CEFM
   This presentation will focus on fetal monitoring during labor and delivery, paying particular attention to how monitoring is used to predict outcomes for these infants and families. (EI)
6. “Beyond Patient Experience”
   Marcus Engel, MS, CSP, CPXP
   Marcus Engel, MS, CSP, CPXP is a Certified Speaking Professional & author whose messages provide insight and strategies for excellent patient care. His keynote presentation, “The Other End of the Stethoscope” has been witnessed by tens of thousands of healthcare professionals and his books are used in scores of nursing and allied health programs to teach the basic foundations of caregiving. GENERAL SESSION SPEAKERS

Beth Nachtsheim Bolick, DNP, ARNP, PPCN-BC, CPNP-AC, FAAN
Dr. Beth Bolick directs the Rush Acute Care PNP program which is nationally recognized for excellence. She is the co-editor of the text Pediatric Acute Care: A Guide for Interprofessional Practice. Dr. Bolick has transformed the care of ill and injured children through establishing new standards in pediatric emergency care, conceptualizing new pediatric nurse practitioner role and education models, and advocating for policy changes to improve the quality of nursing care for these children at the state and national levels. Dr. Bolick has been a member of the state of Illinois’ Emergency Medical Services for Children (EMSC) since 1994. The Illinois EMSC is now the model for facility recognition for pediatric centers across the country.

Over the past three years, Dr. Bolick’s work has been to improve the effectiveness of interprofessional healthcare teams. She is a Robert Wood Johnson Foundation Executive Nurse Fellow who worked with a Fellows national project team to provide healthcare leaders resources to develop and implement interprofessional policies and improve interprofessional communication and teamwork.

33RD ANNUAL CONFERENCE

WEDNESDAY SEPTEMBER 27, 2017

CONFERENCE DESCRIPTION

The conference is designed to offer extra education, development of knowledge, and practical applications that will enhance the care of the mother and baby. It is a great opportunity for professionals who care for obstetric and neonatal patients in either inpatient or outpatient settings.

This conference is designed to offer extra education, development of knowledge, and practical applications that will enhance the care of the mother and baby. It is a great opportunity for professionals who care for obstetric and neonatal patients in either inpatient or outpatient settings.

1. List the criteria and limitations for diagnosis of perinatal sepsis; outline management recommendations for maternal and neonatal care.

2. Define normal physiologic birth; describe therapeutic hypothermia.

3. Identify at least one experience families of children with complex medical needs face; process through developmental follow-up care to optimize outcomes, and ways to help families transition to home; discuss the criteria for and implementation of therapeutic hypothermia.

4. Examine what makes up a family and how cultural, social, and economic factors can influence family development; discuss the criteria for and implementation of therapeutic hypothermia.

5. Understand what culturally competent family-centered care means; outline management recommendations for maternal and neonatal care.

6. Understand how to effectively communicate with families; discuss clinical care for neonatal intensive care unit (NICU) families and the role of the family in the NICU.

7. Understand the role of parents in the newborn nursery; describe how to support families for infants with NAS.

8. List the criteria and limitations for diagnosis of perinatal sepsis; outline management recommendations for maternal and neonatal care.

9. Identify at least one experience families of children with complex medical needs face; process through developmental follow-up care to optimize outcomes, and ways to help families transition to home; discuss the criteria for and implementation of therapeutic hypothermia.

10. Examine what makes up a family and how cultural, social, and economic factors can influence family development; discuss the criteria for and implementation of therapeutic hypothermia.

11. Understand what culturally competent family-centered care means; outline management recommendations for maternal and neonatal care.

12. Understand how to effectively communicate with families; discuss clinical care for neonatal intensive care unit (NICU) families and the role of the family in the NICU.

13. Understand the role of parents in the newborn nursery; describe how to support families for infants with NAS.
